The aim of the game at right is to use the letters A through P only once in any line across or down and only once in each of the 4 x 4 squares.

For example; The top left 4 x 4 square in the game J, A, C, L, D, B, F, N, G, P, and J are already used leaving E, H, I, K, M, and O to fill the remaining squares.

It is a simple game of logic where the degree of difficulty is determined by the amount of letters given.

No answers are given as there is only one solution (no guesswork) and you will know if you have it right.
